👤 Portfolio

Education

Vellore Institute of Technology

B.Tech in Computer Science - 8.99 CGPA

Bhopal, MP

Sept 2023 – May 2027

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Database Management, Computer Networks

Technical Skills

Languages: Python, Java, JavaScript, TypeScript, SQL

Backend: Django, FastAPI, Flask, Node.js, REST APIs, GraphQL

AI/LLMs: OpenAI API, LangChain, RAG Pipelines, Vector Databases, AI Agents

Databases: PostgreSQL, MongoDB, Redis

Scraping & Data: BeautifulSoup, Scrapy, Playwright

Cloud & Tools: AWS, Docker, Kubernetes, Git, CI/CD, Async Programming

Experience

Full Stack Developer Intern

EaseHawk Technologies

Gurugram, UP

Apr 2026 – Present

- Building **MoxSend**, an AI-powered cold email platform serving **5,000+** users using **Node.js**, **TypeScript**, and **Redis**.
- Developed scalable APIs, queues, and caching with **Node.js**, **TypeScript**, and **Redis** for high-performance applications.
- Engineered **multi-tenant** campaign management, **AI-powered replies**, scheduling, and workflows for email delivery.
- Deployed scalable production infrastructure on **AWS**, ensuring **secure**, **highly available**, and **cost-efficient** cloud services.

Software Engineer Intern

MyTripGoal

Noida, UP

Aug 2025 - March 2026

- Developed scalable **Python** backend services and REST APIs using **FastAPI** and **Node.js** for travel booking workflows.
- Built AI-powered automation workflows using **LangChain**, **OpenAI APIs**, and **vector embeddings** to automate itinerary generation, booking assistance, and intelligent customer query handling across travel operations.
- Designed scalable backend infrastructure handling **10K+** users using **Redis caching**, **PostgreSQL optimization**, and **asynchronous processing**, significantly improving API response times and overall system reliability.
- Integrated secure **REST APIs** and backend workflows for scalable booking and transaction management systems.

Projects

EduNage AI: Intelligent ERP SaaS Platform

[Link](#)

- Built scalable backend services using **Node.js**, **FastAPI**, **PostgreSQL**, and **Redis** for **4K+** active users.
- Built secure **REST APIs**, asynchronous notification workflows, and AI-assisted automation modules for attendance, fee management, and academic operations across multi-tenant school environments.
- Optimized **PostgreSQL** queries and **Redis** caching, reducing API response times by **45%**.
- Integrated **Razorpay**, processing **2,500+** transactions with automated reconciliation and reliable payment validation.

SafeSurf AI: Intelligent Content Moderation System

[GitHub](#)

- Built real-time AI moderation backend using **Python**, **FastAPI**, and **NLP models** to detect unsafe content.
- Developed intelligent moderation pipelines processing structured and unstructured multimedia data using **OpenCV**, **vector embeddings**, and **asynchronous processing** for scalable low-latency classification workflows.
- Integrated **TensorFlow** and **OpenCV** pipelines achieving **90%+** accuracy for AI-powered multimedia moderation tasks.

Achievements

Competitive Programming: Solved 500+ problems on LeetCode (Rating: 1500+, Top 8%), 200-day active streak

Hackathon Recognition: 5× Winner at CodeVerse, HackByte, Cisco Codeathon, Hack4Health, MP Police Cyber Security

Google Summer of Code 2024: Selected as contributor (Top 2% globally)

Cloud Certifications: Azure Fundamentals, Google Cloud Generative AI & MLOps Certifications

Freelance Experience: Delivered 6 production applications ([SDPL](#), [Plotify](#), [EduNage](#)) serving 20,000+ users

Publications & Authorship

Research Publications: Published 3 papers including "Leveraging Kubernetes for LLM Deployment" in IJFMR (Jan 2025)
